Office Action Summary	Application No. 10/810,002	Applicant(s) HEALY ET AL.	
	Examiner J. Casimer Jacyna	Art Unit 3754	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3754

1. Claims 3, 5, 6, 17, 27, 30-35 and 40 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 2/7/2007.

2. The indicated allowability of claim 43 is withdrawn in view of the newly discovered reference(s) to Flock. Rejections based on the newly cited reference(s) follow.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 24-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 24, it is not certain if the housing in the claimed combination of a container and a housing is the same or a different housing from the housing defined in parent claim 19. It cannot be determined if Applicant is further defining the housing of claim 19 or is claiming a combination of a new and additional housing from the housing defined in claim 19.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 19-21, 28, 29, 43 and 44 are rejected under 35 U.S.C. 102(b) as being anticipated by Flock (3,351,239). Flock discloses an actuator cap 10 for a container 25

Art Unit: 3754

with a main wall 29 that varies in cross section, an actuator member 55 that extends transversely at 61 and terminates at an outer peripheral surface that extends beyond a portion of the main wall at 31 as seen in figure 2, but does not extend beyond the greatest lateral extent of the main wall at 30, an upright member 36 which is immediately adjacent the actuator, guides the actuator movement with 38, 39 and encloses and protects the actuator as claimed and has a curved outer surface 35 that contacts a spaced housing 14. In regard to claim 43, Flock discloses a gusset 57 that has an arcuate portion at 40.

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 22, 23, 45 and 46 are rejected under 35 U.S.C. 103(a) as being unpatentable over Flock (3,351,239). Flock discloses a combination substantially as claimed but does not disclose the specific claimed dimensions. However, one of ordinary skill in the art would have considered the actual dimensions of the container and actuator to be design considerations that are obvious to and well within the scope of knowledge of one of ordinary skill in the art.

9. Claims 24-26 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Art Unit: 3754

10. Claims 48-50 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

11. Claims 51-53 are allowed.
